

Paper

Working in groups of four (assigned at random [here](#)), you will read and summarize three papers published in one of the related journals listed [here](#) (highlighted journals are most relevant, start there). Here's how you should proceed. All deliverables should be sent to probhw602@gmail.com from one member of each team only.

1. Choose a topic relevant to this class (e.g. GAAP, accounts receivable, inventory accounting, depreciation accounting, accrual accounting, valuation, yield curve, term structure of interest, bonds, immunization etc.)
2. Choose **seven** articles from the list of journals on this topic and print the first page of each of the seven articles. (Use the E-journals link on AUB libraries website [here](#).) Off-campus access is available. Talk to the library staff if you need help. NO GOOGLING.
3. Submit an eight-page proposal with the first cover page containing (i) your group member names, (ii) the topic selected, and (iii) a list of the seven selected articles. Page 2-8 are simply the first page of each of the seven selected articles. Due Thu Nov 12, 2020.
4. I will choose three of the seven articles from your proposal, on Mon Nov 16, 2020.
5. Write a six-page (font 12, double-space) summary of the selected papers with three sections (two pages at most for each) on (i) overview of the papers and major findings, (ii) research methodology, and (iii) your own critique emphasizing comparing the three papers. This first draft is due Mon Nov 23, 2020.
6. Receive my feedback on your first draft on Mon Nov 30, 2020 with a preliminary grade.
7. Present your summary in five minutes to the class on Wed Dec 2, 2020.
8. Finally, include my comments and submit a final draft by Fri Dec 4, 2020.
