

Faculty of Engineering and Architecture
American University of Beirut

To Whom It May Concern:

Salim Chedrawi took my probabilistic Operations Research class in Spring 2009. He performed well in my course ending in the top 25% of the class (having 40 of AUB's engineering students) with a grade equivalent to A-. He demonstrated good mathematical and logical reasoning skills. He also displayed a good command of English both verbal and writing.

Salim comes to me often and asks questions about graduate study in the US. He seems serious and excited about pursuing a Master's degree. I recommend Salim for graduate study with no reservations.

Sincerely,

Bacel Maddah, Ph.D.
Assistant Professor
Engineering Management Program
American University of Beirut
